The measure of a civilized society is not only its achievements, but the quality of its aspirations

General Group Partners: TREINADOR

CORPORATE BACKGROUND

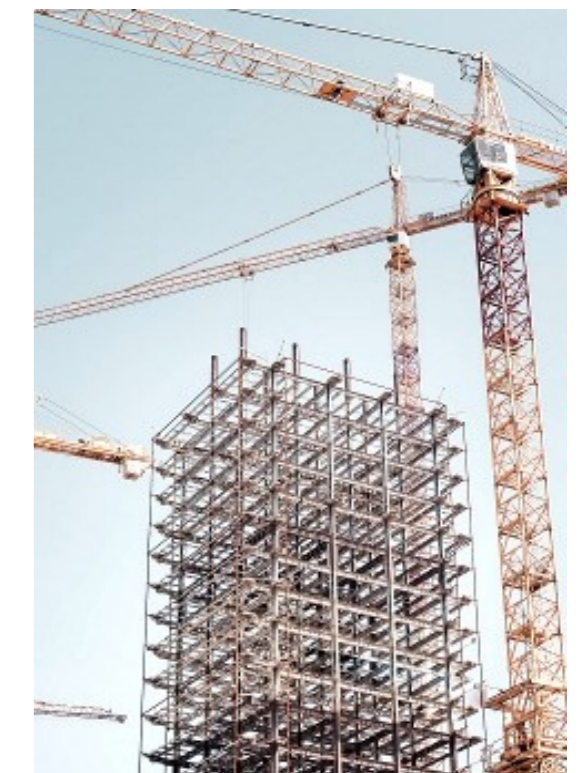

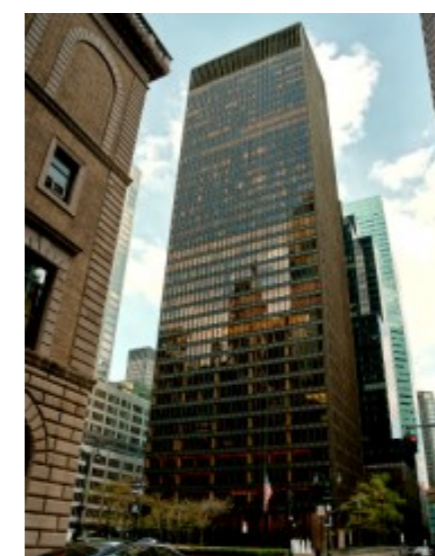

We are a multi-dimensional engineering, construction and general order supplying company having its presence in three continents highlighting several offices & hundreds of employees featuring more than twenty highly experienced & seasoned Project Managers. Our distinguished team is our cutting edge over our competition. Our team presents more highly skilled & trained Project engineers and a production staff of 200 units directly involved in domestic and foreign work sites. We have been in the business of construction and engineering since 2009 as a sole proprietor and has consistently evolved & grown over the last 12+ years to become a trusted partner for the execution of complex and iconic projects. The company builds and provides solutions to exceed our clients' expectations for quality, safety, functionality, and aesthetics.

An integrated team of designers, engineers, construction managers & personnel are supported by innovative project management systems, in-house resources and extensive IT investment. TIS owns a large plant & machinery fleet as well as advanced joinery workshops & a dedicated R&D division.

TIS has extensive experience in complex projects across diverse sectors including construction, roads / highways, resorts, high-rise buildings, themed projects as well as construction management, design management, estimating, cost planning and procurement. We bring an idealistic approach which possesses a Design and Build capability enabling us to provide integrated construction solutions to our clients..

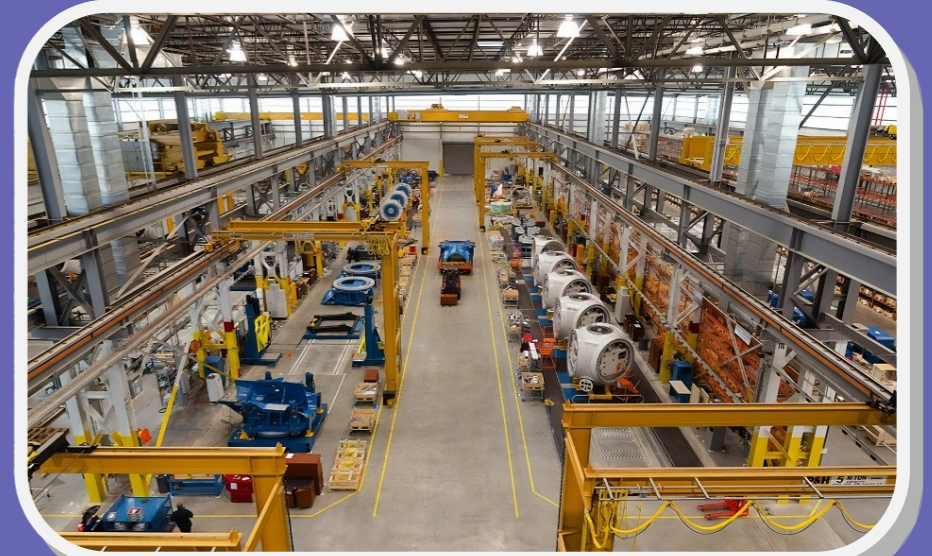

We are building the Future! with the ethics of utilizing latest technology, following global business standards, saving environment, ensuring highest quality and commencing on-time deliveries with the complete satisfaction of the customers.

DIVERSE SECTORS

We are equipped to advise clients on all aspects, strategic or sector-based work, we take a holistic approach in developing innovative and sustainable solutions that meet our clients' cost, time and quality objectives.

Stadiums and Arenas

By collaborating with great engineers and architects, Cimolai is developing works of high technology and beauty, enriching its portfolio with sports works of worldwide resonance.

The roof structure is composed of a triangular spatial truss fabricated from tubular sections; 40 m long cantilever trusses spanning from the spatial truss, spaced at approximately 13 m, using fabricated "double-T" beams.

Capacity: 71,000 seats
Description: tubular double arch spanning approximately 300 m and supporting the roof structure (shaped plate girders, including main & secondary cable stays). The roof was constructed outside the stadium before being slid over the stands.

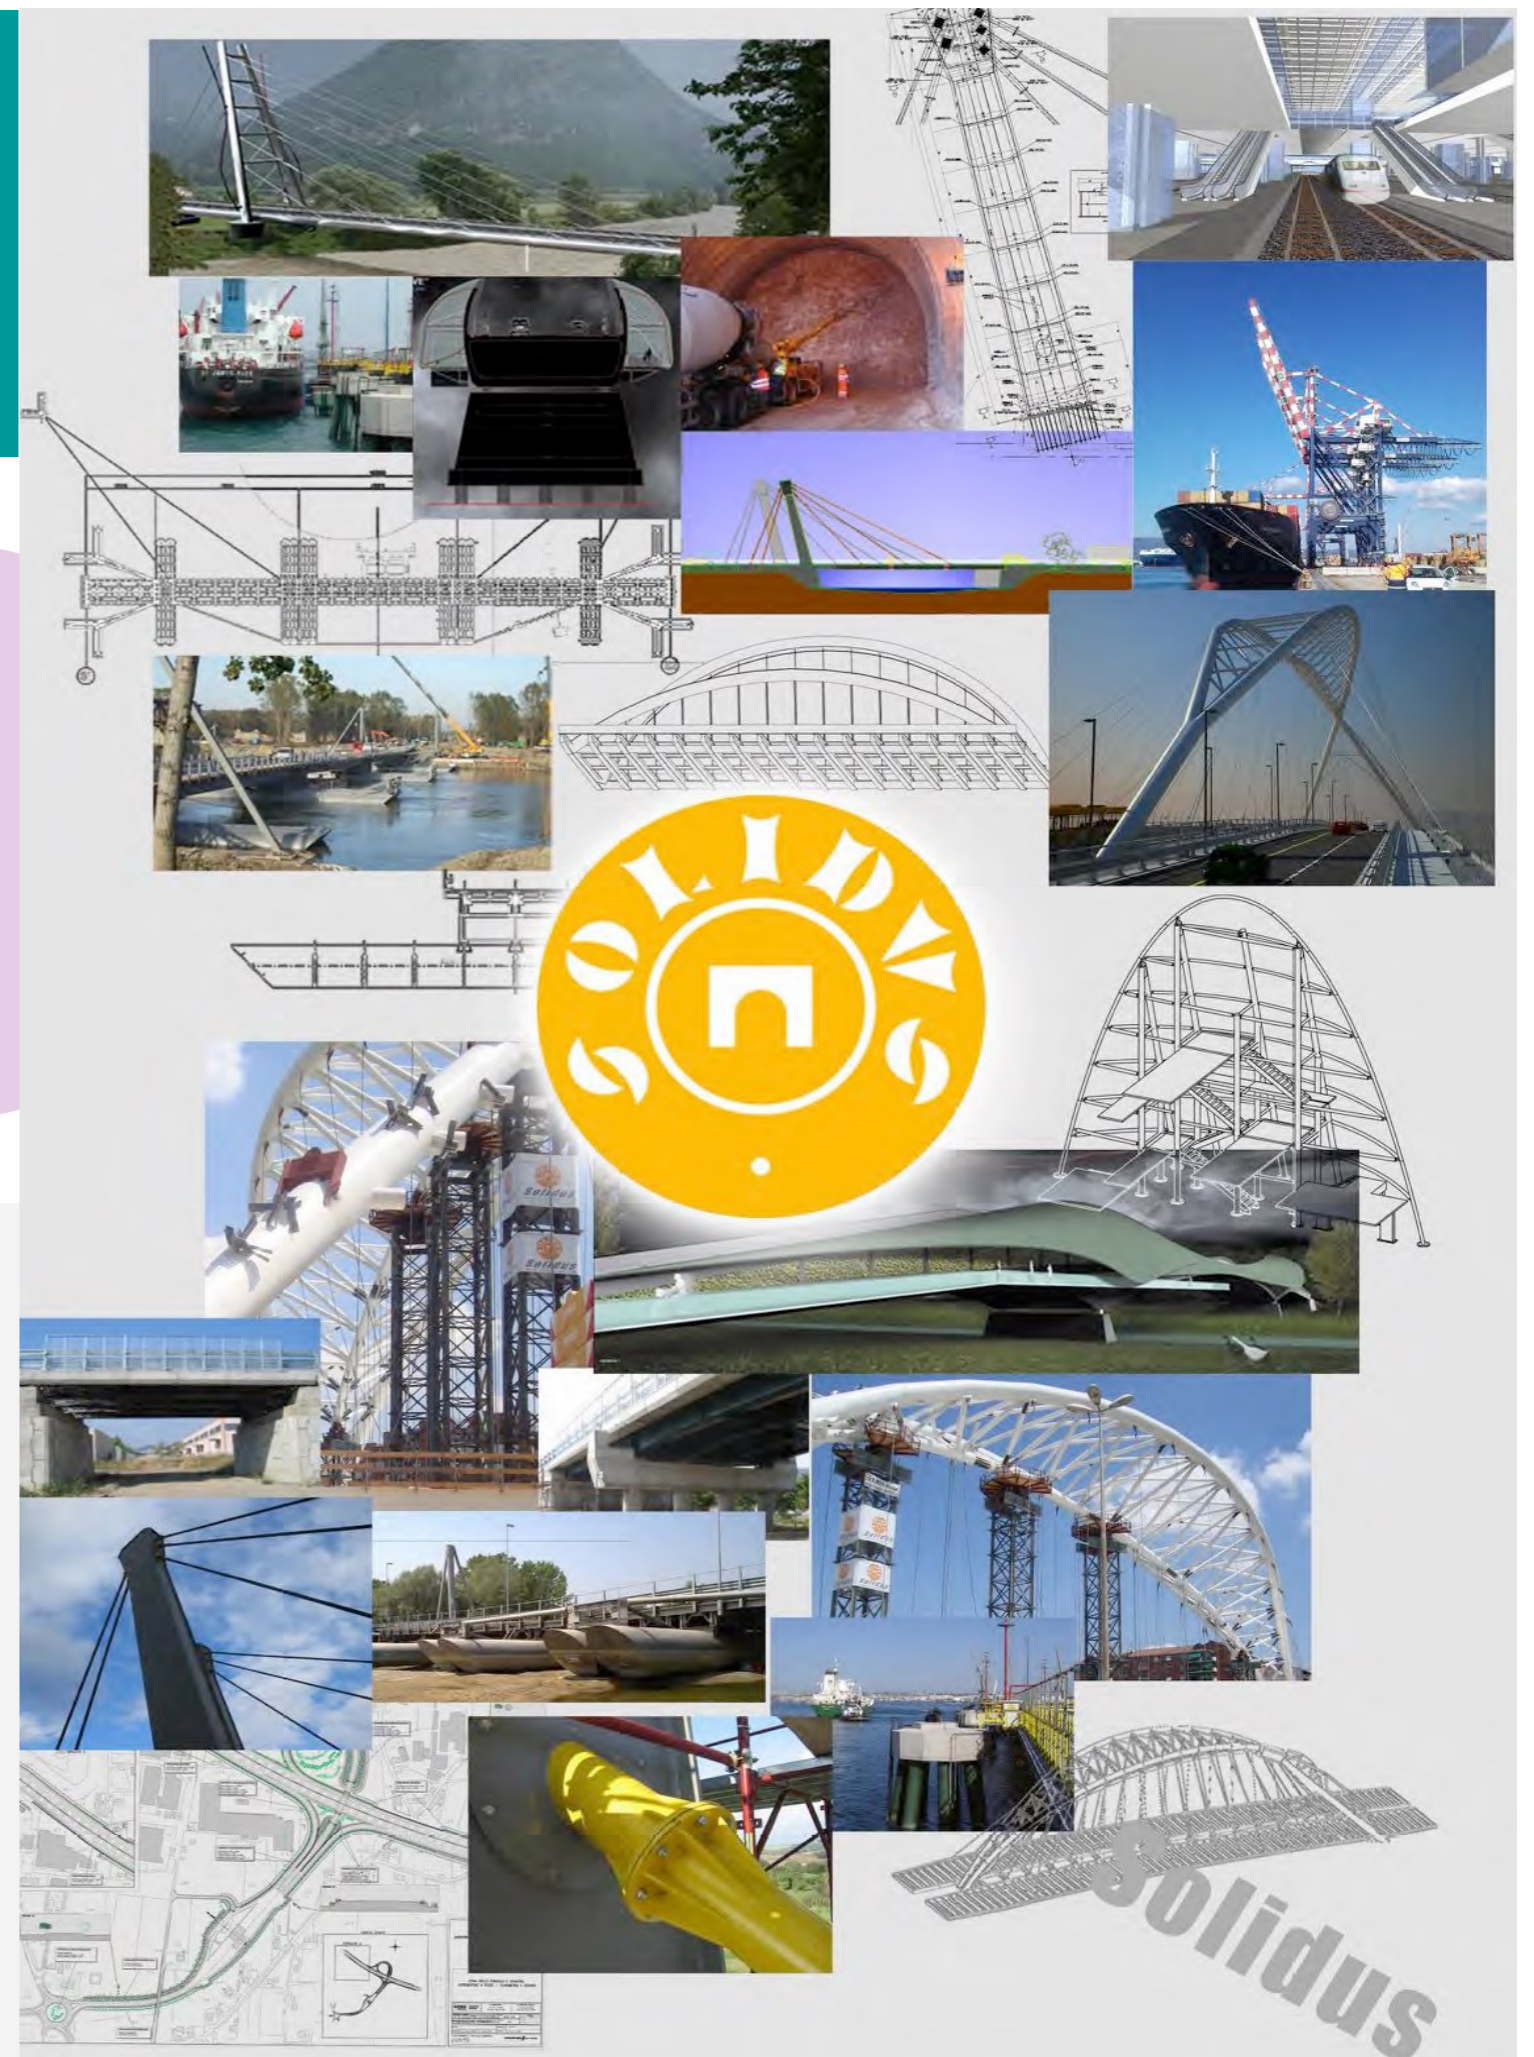

General Group Partners: Solidus

Professionalism

In providing our clients with the highest caliber consulting services

Your Partners in Excellence

At Solidus Management Consulting, our aim is to provide our clients with a one stop shop for all their business needs. From business strategy to training and development and media and marketing services, at Solidus we provide our clients with customized business solution packages tailored specifically to suit their needs. With a highly skilled network of both local and international consultants and service providers, Solidus Management Consulting is sure to provide you with the right solution to meet your organizational objectives.

NSCB International Airport, Kolkata, India

Capabilities & Projects-Aviation

A modern, safe and efficient aviation system is critically important for all nations whether large or small, developed or developing. Only with technologically up to date and efficient airports of adequate capacity, can a nation's aviation system reach the required standards.

The **General Group AG** and its partner companies have the experience and capabilities to deliver first class, modern airport and associated aviation facilities.

Our services include:

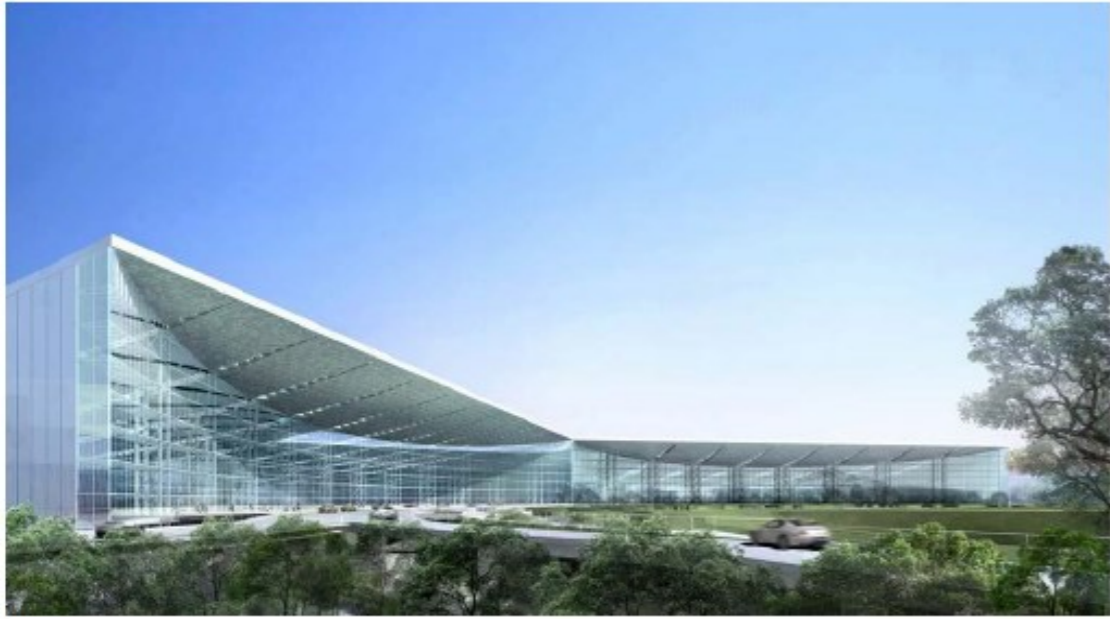

Advanced engineering and architectural services
 Airport studies & master plans
 Culturally and environmentally sensitive designs for all infrastructure including:

- Terminals
- Runways & taxiways
- Freight facilities
- Navigation & Communications facilities
- All supporting facilities
- Ground Transport Interchanges

Turnkey Contracts for construction and equipment supply and commissioning
 Condition assessments and Refurbishment and Rehabilitation of Existing Airports
 Operation & Maintenance Services

Quarantine zones

For instance, we offer so-called quarantine zones for Ebola-afflicted areas. These isolation units are provided with sanitary facilities and special ventilation systems in order to treat an infected patient without any restrictions. For the treatment and isolation of high-risk patients, we developed a concept based on experiences and the close collaboration with leading hygienists and Ebola Coordinators.

Infusion factories

Another special solution are infusion factories, which we fully plan for you, implement and support during commissioning. The import of expensive antibiotics and infusion would therefore no longer be necessary. You could produce your own antibiotics and infusion for your market. However, infusion must be produced responsibly. With our professional expertise, we are at your side at all time.

Radiology

Capabilities & Projects -Marinas & Coastal Facilities

Keppel Marina, Singapore

Keppel Marina, Singapore

Wuhan Splendid River, Wuhan, China

There is an increasing international demand for new marinas and other coastal facilities either on a standalone basis or as part of an integrated tourism or leisure development. There are also ongoing requirements for public sector marine developments for government agencies such as Water Police, Customs and Coast Guards.

Coastal facilities not only call for specialist architectural and engineering expertise but considerable care must also be taken to identify and preferably mitigate any of the development's environmental impacts.

The **General Group AG** and its partner companies have the specialist marine experience and capabilities to deliver attractive, functional, cost-effective and robust marinas and other coastal infrastructure along with supporting
